

Diego Câmara

Full-Stack Software Engineer

São Paulo, working remotely · diegodscamara@gmail.com · diegocamara.com · linkedin.com/in/diegodscamara · github.com/diegodscamara

ABOUT

I am Diego Câmara (Diego Dos Santos Câmara), a full-stack software engineer based in São Paulo, Brazil, with 5+ years of experience building TypeScript, React, Next.js and Node.js products. I work remotely at Luxor Technology (Luxor), a bitcoin mining infrastructure company, where I build fleet automation with Temporal and real-time dashboards on ClickHouse and PostgreSQL. Before that, I built a RAG documentation assistant on Azure OpenAI at Genetec, for documentation used by 53,000+ people. On the side, I am building AdPilotPro, an Amazon PPC automation SaaS. I speak native Portuguese, C1 English, B2 French and A2 Spanish.

EXPERIENCE

Luxor Software Engineer, remote, Seattle-based team Aug 2025 - Present · 1 yr 2 mos

- Delivered features for the Energy and Commander launches across a monorepo of 10+ services.
- Built typed service integrations with tRPC, Connect RPC and protobuf, behind Ory Keto tenant permissions.
- Automated firmware, power and pool configuration with Temporal, so operators manage hundreds of miners in one operation.
- Built real-time fleet dashboards on PostgreSQL, ClickHouse and Redis.

Next.js · Fastify · Temporal · tRPC · ClickHouse · Redis

Genetec Software Engineer, remote, Montreal-based team Oct 2022 - Jul 2025 · 2 yrs 10 mos

- Built a RAG assistant with Azure OpenAI and Node.js for documentation used by 53,000+ people.
- Automated release-note publishing with Azure CI/CD, Node.js and PowerShell, with safe retries for failed runs.
- Delivered multilingual React documentation portals.
- Expanded Jest and React Testing Library coverage and mentored engineers through reviews and pairing.

React · Node.js · Azure OpenAI · Azure DevOps · Jest

Eu Médico Residente Software Engineer, remote, Recife-based team Jun 2022 - Oct 2022 · 5 mos

- Built a React learning platform with adaptive video streaming on AWS S3.
- Developed Node.js, Express and Prisma REST APIs, covered by Jest and Cypress.

React · Express · Prisma · AWS S3 · Cypress

NSH Technologies Software Engineer, remote, São Paulo-based team Jul 2021 - Jun 2022 · 1 yr

- Shipped React and Redux storefront features for Tambasa ahead of its IPO deadline.
- Integrated payment processing through Node.js REST APIs and webhooks.
- Improved product-page accessibility against WCAG 2.1.

React · Redux · Node.js · WCAG 2.1

SIDE PROJECT

AdPilotPro adpilotpro.com

Amazon PPC automation SaaS I am building on the side. Rules adjust bids, negate wasted search terms and harvest winners, and every change is logged with the reason it happened.

- Next.js web app, Fastify API with generated OpenAPI client, BullMQ workers for multi-hour Amazon report jobs.
- AI agent service on the Anthropic SDK that calls backend tools over HTTP and streams answers.
- Drizzle on Postgres, Better Auth, Redis, deployed on Railway.

STACK

Frontend: TypeScript, React, Next.js, Redux, Tailwind CSS

Workflows and AI: Temporal, tRPC, Connect RPC, protobuf, Ory Keto, Azure OpenAI, RAG

Backend and data: Node.js, Fastify, Express, PostgreSQL, ClickHouse, Redis, MongoDB, Prisma

Delivery and testing: Azure CI/CD, AWS S3, Jest, Cypress, React Testing Library

LANGUAGES

Portuguese (Native) · English (C1) · French (B2) · Spanish (A2)

EDUCATION

B.Sc. Software Engineering, Cruzeiro do Sul University, 2023

Associate, Systems Analysis and Development, Cruzeiro do Sul University, 2020
